

Pick Default Programs for Files on your Surface

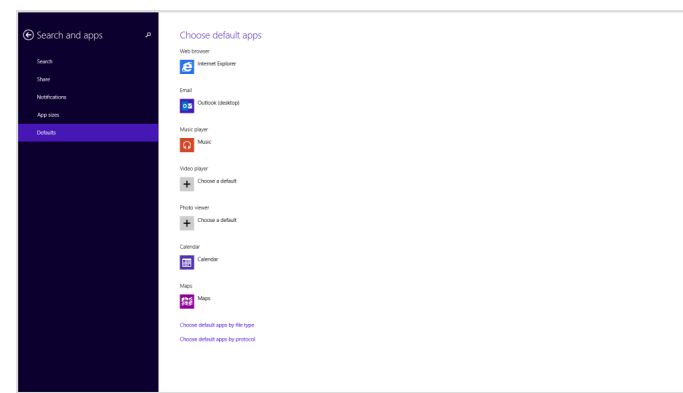

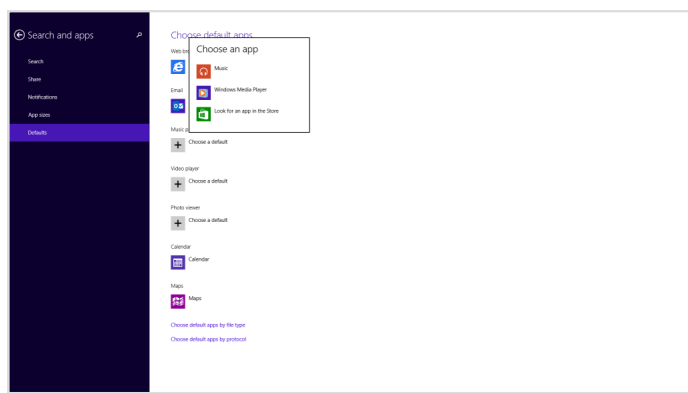

First thing you need to do is get to the Default Programs settings page. To do so, just follow these instructions:

- Bring up the **Charms Menu**
- Select **Settings**
- Select **Change PC Settings**
- Choose **Search and apps**
- Select **Defaults**

Once there, you'll (hopefully) see the screen to the right. From that screen, you can choose the default apps to use for the following by clicking on one of the options listed

In the illustration on the left, you can see that I'm choosing the Metro Music program for my Music app as I didn't have a default set.

In the illustration to the above right, you can see that my Music app is now configured. Easy huh? You can find more tips and tricks for using your Surface tablet and Windows 8 on our website (<http://lovemysurface.net>).
